Updates produced by noise alone versus updates of real chains
largest noise-only step 0.063%
no-op (noise only)
real chains
no-op candidates, rank rule: 24 updates in 8 runs
real DeepSeek greedy chains: 51 updates in 5 runs
10^{-3}
10^{-2}
10^{-1}
10^{0}
10^{1}
size of one record update: 100 x (1 - R_new / R_previous), % (log scale)
